

# Enhanced Vetting

## Be in the right

Use our fully compliant Right to Work check, to demonstrate leadership in workforce management.

## Save time & money

Employees & subcontractors can register themselves online using the MSite platform before starting work.

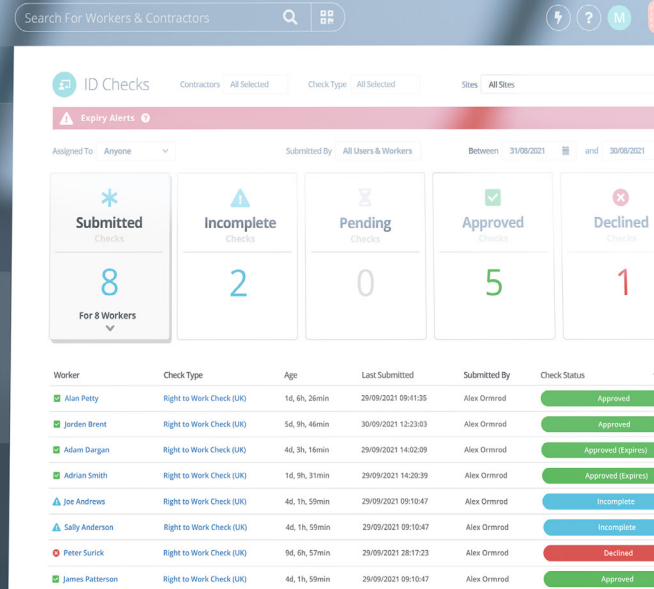

## A paperless, secure solution

By digitalising right to work checks, the process becomes streamlined and is easily documented.

James Patterson	Right to Work Check (UK)	4d, 1h, 59min	29/09/2021 09:10:47	Alex Ormrod	Approved

MSite Enhanced Vetting enables management to order physical checks of competency and right to work documentation from their workers, as a part of the workforce registration process.

## Prevent fines & reputational damage

Avoid costly fines, prison time and site shutdowns due to hiring illegal workers. Also prevent negative press and PR, which causes damage to your reputation as a contractor.

## Remain compliant

Our solution ensures compliance with new right to work procedures, such as supporting share codes and Frontier Worker Permits, in line with new Home Office legislation that came into effect 1st July 2021.

## Sensitive Sites

Complete enhanced verification checks for workers on sensitive sites, for example creating a DBS check workflow for school projects.

## Restrict Site Access

Ability to restrict access to site if Enhanced Vetting criteria has not been met.
