

MSite Pod

Site Security

MSite POD automatically restricts site access of workers who don't have the correct induction, training, accreditations or are fatigued.

Create detailed reports

Capture access and attendance data and manage your site employees securely in one place.

Fire Alarm Integration

Integrates with your wireless fire alarm system to automatically set turnstiles to free spin the moment an alarm is triggered.

[Learn More >](#)

MSite Pod is a container with a full height turnstile, biometric reader and a lockable door – managing site access and security using our MSite platform. Choose either our Face Reader or Fingerprint Reader to be fitted inside the POD for completely contactless sign-in and site access.

Rapid installation

Up and running in four hours.

Further drive productivity

Time & Attendance data gathered can be used to improve operations, for example reviewing actual hours worked vs planned hours.

Customisable for your brand colours

Available in your company colours and branding.

KPI Reporting

Report on social value: local labour, carbon footprint and apprentices on site. Also health & safety KPIs such as worker to supervisor ratios, training log and worker competencies.
