Address	25 Innovation Blvd, Liverpool,

Learn More >

Pre-registration allows workers to register their own details online, before they arrive at site, saving valuable admin time for the principal contractor's site team and removing the need for paper forms.

Lasting Digital Record
Workers' profiles are securely stored on our cloud-based system, creating a lasting digital record.

Consistent Data Capture
All worker profiles are captured using the same MSite form, which makes reporting easy. You can easily search for workers who are registered on your site and retrieve their digital records.

User Friendly Interface
It is super easy for your sub-contractors to issue invitations to their workers, and for workers to fill in their details.

One Time Registration
The worker's digital passport is created which can then be shared with all your projects as required v- no need for data capture duplication across site.
