

# MSite Briefings

## Facial recognition

Sign workers into briefing sessions quickly and easily using facial recognition.

## Preload content

Preload content before the session centrally or at site level.

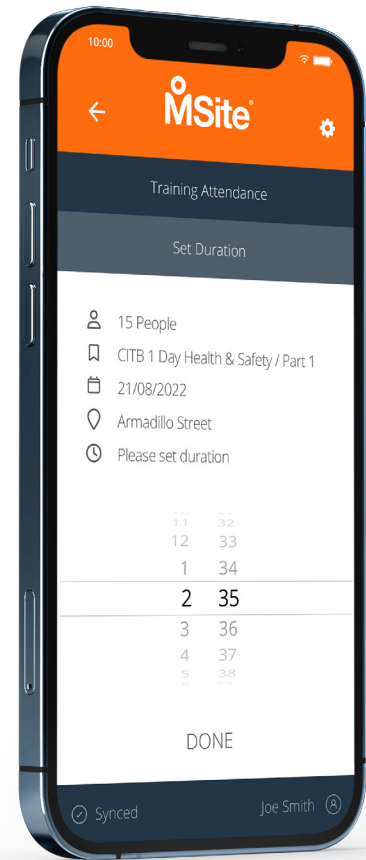

## Can use offline

Download content beforehand then sync when reconnected.

[Learn More >](#)

From daily activity briefings and toolbox talks to safety critical briefings and site orientations, MSite Briefings gives you a lasting digital record of who has attended which briefings, when they took place and what was covered in each session.

## Competency Management

Use competency reports to see who has/hasn't been briefed.

## Start/end shift

For all workers in the session to save time clocking in / out after the session.

## Capture content

live during the session, e.g. take a photograph of Ad Hoc materials.

## Compatible with most devices

MSite Briefings is compatible with most Android and Apple devices, and is updated regularly to ensure it works effectively with the latest 3 versions of the operating systems.
