Fatigue Management

Boost productivity
Ensure workers are alert while on site, avoiding mistakes from tiredness and ultimately improving workforce productivity.

Health & Safety Compliant
Comply with any health & safety regulation that requires fatigue monitoring, such as ROGS regulation.
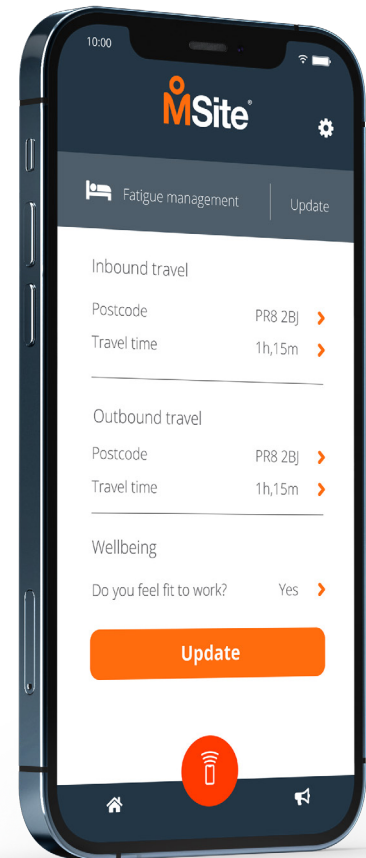

Highlight Fatigued Workers
Our solution highlights workers at risk of fatigue in real time, so preventive measures can be taken mid-shift.

Learn More >

MSite Fatigue Management enables monitoring of your site team fatigue levels throughout your project - keeping your site safe. Ensure your team aren't making mistakes by guaranteeing they're well-rested and not overtired.

Reporting
Accurately report on worker fatigue measures covering hours worked, commute times, rest days and more. A paperless process with digital reports are automatically formatted in HSE Fatigue Risk Calculator, removing the need for manual calculations.

Data Capture compatibility
Our Fatigue Management module can be used with either Workforce or Supervisor App. For the Workforce App, when signing into site (for time and attendance) workers have the option to input their travel data. Alternatively Site Managers can use the Supervisor App to submit worker travel data on their behalf.

Time/cost saving
An effective fatigue management solution which boosts productivity, lowers health costs and reduces worker absences.

Best Practice
Our solution embeds ORR best practice guidelines relating to fatigue risk management.
