

MSite Safety

Safety as a Priority

Easily check supervisor to worker ratios, number of fire marshals on-site etc to ensure a safe and productive working environment.

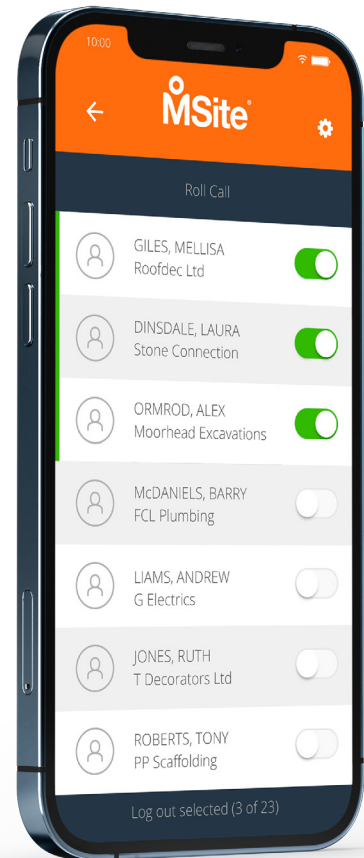

Briefings Attendance

Digitally capture worker attendance at all daily site briefings and toolbox talks. Attach attendance to their MSite profile.

Worker Notifications

When combined with the Workforce App, you can send instant notifications to all workers or to groups of workers.

[Learn More >](#)

Better safe than sorry. MSite's Safety module allows you to check that workers on site are properly trained and qualified in their respective role, in addition to other helpful features.

Trade Check

Highlights differences between the occupation stated on a worker's skills card and the trade they are designated to perform on site, notifying MSite users of any mismatches.

CITB & CSCS Validation

Automatically checks and validates any CITB & CSCS cards against the CITB database, ensuring workers are trained and authorised to work on site.
