

# Sustainability

## Diversity Reporting

Accurately track & report on overall workforce diversity in real time, (*age, gender, and ethnicity*).

## Local labour commitment

Capture worker postcodes, & confirm exactly who is on site at any point in time.

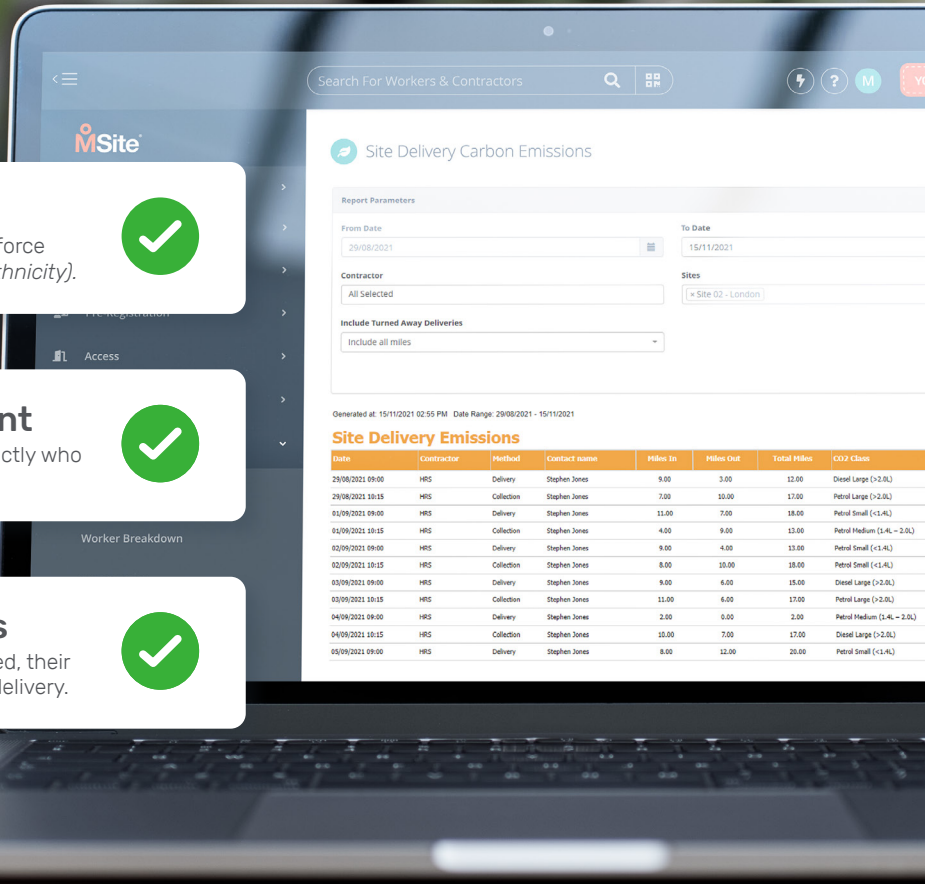

## Record Apprenticeships

Report on the number of apprentices hired, their hours worked on site & broader training delivery.

[Learn More >](#)

Our sustainability module provides rich data and reporting relating to who is working on your site. In particular areas such as social value and the environment for example monitoring carbon footprint.

## Vital insights

Our Sustainability module provides the tools to capture and report against key workforce, social value & carbon emission metrics. These insights can be used to evidence how you meet tender requirements and improve your prospects of being awarded future contracts.

## Carbon Emission

During the registration process MSite captures worker commute and inbound delivery data, recording the distance workers have travelled and the distance deliveries have covered. These results help calculate the site's carbon footprint.
