Digital Construction Solutions

Best in class:

✅ Access Control & Workforce Management

✅ Fire Management

Be Safe. Be Productive.

Contents

What is MSite?

MSite is a digital workforce management system for construction.

We are the **UK's leading platform** for access control and workforce management in construction.

Leading biometric experts

Drivers of innovation

Reliable partners

Dedicated & passionate team

See page 8 to see our extensive product range to help keep your workforce Safe & Productive.

Our Values

Joining the Infobric Group has enabled MSite to alignwith other like minded companies who strive to fulfil our common values.

Embrace challenge

Achieve together

Be your best self

Do the right thing

MSite Solutions

You can choose one or more MSite solutions
for your site or business, or you can get them all.

MSite Pre-Registration

Enables your workforce to register before arriving on-site, saving time for your site team.

Page 10

MSite Online Inductions

Get your workers to complete an online induction, ensuring consistency on safety information.

Page 11

Access & Attendance

Registered workers can enter sites quickly and easily.

Pages 12 - 19

MSite Enhanced Vetting

Strengthen compliance with additional checks including, fully updated and compliant Right to Work checks.

Page 24

MSite Digital Signage

Digital signage to communicate important messages to workers on site and other useful information.

Page 25

Ramtech Fire Management

Protect your site and workers with WES3, the latest in fire and emergency alarm system innovation from Ramtech.

Page 26

MSite Sustainability

Report on crucial carbon emissions data associated with workers travelling to site each day.

Page 21

MSite Safety

Full competency management, CITB integration & App enabled Roll Call & Site Briefings.

Page 22

MSite Delivery Management

Simplify and manage site logistics with online delivery slot bookings.

Page 23

MSite Fatigue Management

Track worker total door-to-door hours to accurately monitor and mitigate worker fatigue throughout the build process.

Page 20

Data Insights

Analyse your data via pre-built system dashboards & custom Power BI dashboards.

ramtech

Powered by Ramtech

Leading global temporary wireless fire alarm system with the WES product suite.

MSite Pre-Registration

Pre-Registration enables workers to pre-register themselves before arriving on site.

Your sub-contractors can send out invitations to their workers in advance, and you can check the workers' progress.

User friendly interface

It's quick and easy for sub-contractors to add workers, and for workers to complete.

Save admin time

Workers complete their profile at home before their first day.

Paperless Process

Our digital approach keeps workforce registration paperless. Gone are the days of filling in and collating paper forms, with all data stored securely in the cloud.

▶ Watch Overview

cscs **citb**

MSite Online Inductions

**MSite Online Inductions enable workers to read essential pre-arrival information before their first day on site.**

This means they arrive on site with an understanding of what to expect, and what is expected of them.
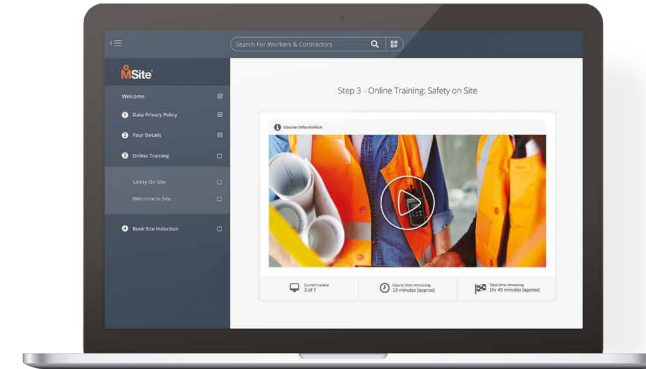

Save time & money

Sharing essential information before the worker starts means your site inductions can be shorter, focussing on only site specific details.

Record of Induction

You can check workers have completed their online induction, and proof of its completion is stored in MSite.

Uploading your own content

You can upload your own content and even tailor it, for example, by trade.

▶ Watch Overview

Our solutions to track attendance

MSite tracks time and attendance of fixed and mobile workforces through either physical or virtual clocking in processes.

Our biometric hardware integrates with MSite software, verifying each worker's individual profile to grant site (or area) entry and log attendance in line with company access and health and safety policies.

ACCESS & ATTENDANCE

MSite Access & Attendance helps you securely manage site access and records attendance through biometric technology.

MSite offers a variety of access and attendance solutions depending on your site setup, with mobile (Workforce app) and hardware based options (MSite POD, MSite Fingerprint Reader and MSite Face.)

TIME & ATTENDANCE

MSite Time & Attendance facilitates monitoring of worker arrival time and exit time on site, using biometric technology.

MSite provide a range of solutions for time and attendance such as Supervisor app, MSite Face Mini and MSite Fingerprint Reader.

MSite POD & Turnstiles

The MSite Pod is a container with a full height turnstile, MSite Face or Fingerprint Reader and a lockable door.

It can be easily relocated by MSite and can be branded in your company colours.

Site Security
Securely manage who is on your site and if they have the right to be there through biometric technology.

MSite Integration
Integrated software enables you to automatically restrict site access of workers who don't have the correct induction, training, accreditations or are fatigued.

Fire Alarm Integration
Able to seamlessly integrate with wireless fire alarm system to automatically set turnstiles to free spin the moment an alarm is triggered.

Did you know?
There are other turnstile options available including half-height & full-height turnstiles.

MSite Face

The MSite Face Reader allows for quick, contactless sign-in and site access.

Contactless Sign-in & Site Access
Enables for completely contactless, biometric sign-in and site access.

Easy Enrolment
Easily enroll new workers straight from MSite, the CITB database or via a webcam.

GDPR Compliance
Biometric data is encrypted and stored securely, fully in line with GDPR regulation.

Did you know?
There is an optional temperature screening module available too.

MSite Fingerprint Reader

The MSite Fingerprint Reader can be used for access control or as a standalone clocking station for Time & Attendance capture.

It can be used as a biometric fingerprint reader, or in tandem with the MSite Workforce App. Both options are GDPR compliant.

Suitable for remote sites

Biometric Sign-in & Site Access Operatives can easily sign into site/ gain site access by presenting their fingerprint to the reader. The integrated screen will display whether access has been granted or denied and if denied, for what the reason.

Contactless Sign-in & Site Access

Operatives use their MSite Workforce App to interact with the MSite Reader for contactless sign-in and site access, leveraging their smartphone's built-in biometrics to verify identity.

PIN Option

There is a PIN fallback for those who cannot utilise the biometric options.

See page 18 for more information on the MSite Workforce App.

MSite Face [MINI]

A dedicated smartphone based time & attendance station, leveraging facial recognition for biometric sign in.

Simple Footprint & Deployment

As the system operates from a smartphone, no further equipment such as external 4G routers or power supplies are required. Users can easily move the unit from site to site without an MSite engineer visit.

Hassle-free set up

Built-in Wifi and 4G connectivity. Move from site to site freely, with no MSite Engineer visit needed.

Easy Enrolment

The MSite Face Mini uses the worker's existing photograph from their MSite profile for biometric enrolment, which are the same photographs used for enrolment with the MSite Face Readers for access control purposes.

See page 19 for more information on the mobile version of the MSite Face Time & Attendance.

App Store — DOWNLOAD ON THE

Google Play — GET IT ON

MSite Workforce App

The MSite Workforce App is a multi-purpose digital solution that places the power of MSite into the hands of the worker.

It's a low-cost and portable biometric solution, which can be used in conjunction with MSite hardware or with the MSite Supervisor App.

Location Check-in

Location Check-in allows users to record Time & Attendance wherever they are, on site or not. It's perfect for lone worker monitoring and capturing T&A for individuals working from home.

Direct-to-Worker Notifications

Directly communicate with the entire workforce or select groups in real time using Direct-to-Worker Notifications. Set recurring messages, send surveys, pre-schedule messages and more!

Contactless Sign-in & Site Access

Workers use their smartphone as a contactless token to sign in and access site, utilising their phone's built-in biometrics to verify identity. It's compatible with both the MSite Supervisor App and MSite Fingerprint Reader for contactless time & attendance capture.
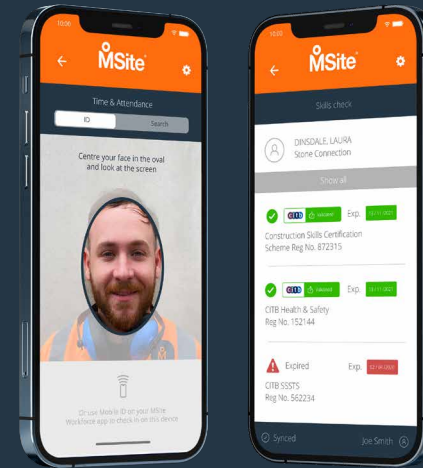

18

App Store — DOWNLOAD ON THE

Google Play — GET IT ON

MSite Supervisor App

A dedicated fielding app providing supervisors with a biometric clocking station and a series of software tools straight from their mobile or tablet device.

It's an 'on the go' solution and syncs with the wider MSite system.

Time & Attendance

Mobile clocking station leveraging facial recognition for biometric sign-in. Alternatively, manually capture time & attendance or set to 'Kiosk Mode', allowing workers to perform contactless, self-service time & attendance capture.

Mobile ID

Instantly search for worker time & attendance, training records and competency cards when a worker presents their face. This allows Supervisors to perform spot checks as they walk around site.

Roll Call

Quickly see who is on-site in the event of a site evacuation, pulling data straight from MSite's Time & Attendance database. Mark individuals 'off-site' as you confirm they're safely at the muster point.

19

MSite Fatigue Management

Track worker hours, commute times and rest days with MSite Fatigue Management

This fatigue management system uses attendance and commute data captured on the Supervisor App or Workforce App, alerting site teams if fatigue thresholds are exceeded.
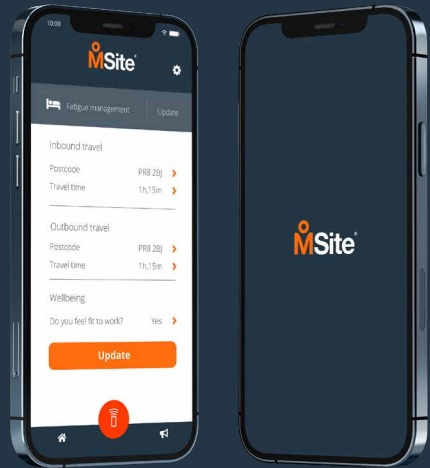

Health & Safety compliance

Comply with any health & safety regulation that requires fatigue monitoring, such as ROGS.

Reporting

Accuratly report on operative fatigue measures covering hours worked, commute times, rest days and more.

Improve safety & productivity

An effective fatigue management solution can boost productivity, reduce the risk of incidents & reduce absenteesim.

MSite Sustainability

MSite's Sustainability solution provides the tools to capture and report against key workforce, social value & carbon emission metrics.

Insights provide a digital audit trail for demonstrating contract compliance.
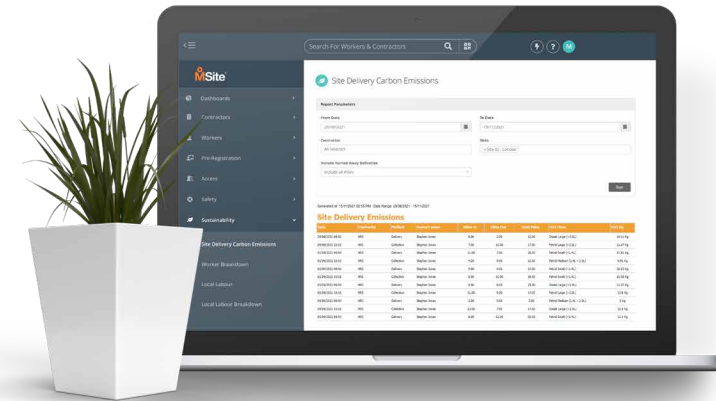

Carbon Emissions

During the registration process MSite captures worker commute and inbound delivery data, enabling management to accurately calculate the travel to site carbon footprint.

Local Labour

The system captures worker postcodes, and by knowing exactly who is on site at any point in time, you can easily maintain and demonstrate your site's local labour commitment.

Promote Diversity

Accurately track and report on workforce diversity, providing insights into key demographics such as, age, gender, ethnicity and apprentices.

Did you know?
MSite is backed by an ESG private equity fund called Summa Equity, with sustainability at its heart.

MSite Safety

MSite's Safety module provides assurance that workers are properly trained and qualified in their respective role, along with some other great features.

Our cloud-based safety solutions digitally track competency and training records, flagging any inconsistencies to site management, and ensuring everyone is complying with health & safety standards.
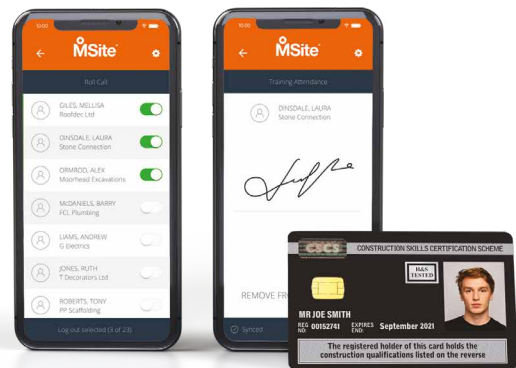

Competency Management

MSite captures and automatically validates competency cards against the CITB database and highlights any mismatches between occupation and trade listed on skills card.

Ratio Alerting

The system notifies users and subcontractors when there are contractors working on site with an insufficient ratio of safety personnel, such as supervisors or fire marshals.

Briefings / Toolbox Talks

Digitally capture worker attendance at all daily site briefings and toolbox talks on a smartphone or tablet via signature, smartcard, smartphone or face recognition verification.

Did you know?
Safety records can be shared across all sites in your group that use MSite.

MSite Delivery Management

MSite's Delivery Management solution provides a full site delivery scheduling tool, ensuring suppliers pre-book delivery slots online prior to their arrival.

Manage your site deliveries simply and efficiently, aiding planning of your on-site plant and manpower, and providing visibility of past, current, and future deliveries.
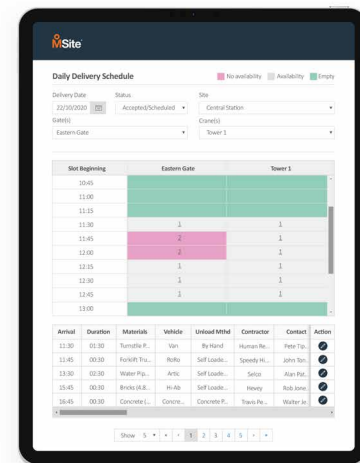

Paperless

Digitalises all material delivery occurrences for planning, auditing, proof of delivery and carbon emission reporting.

Better Planning

Allows you to better manage site deliveries, ensuring all delivery vehicles are booked into an available slot and preventing local congestion.

Compliance

Full delivery slot, for example FORS compliance, submission of adequate lift plans and RAMS.

Did you know?
Automated email notifications are sent when a supplier submits a booking request.

MSite Enhanced Vetting

MSite Enhanced Vetting enables management to mandate physical checks of competency and right to work documentation as a part of the workforce registration process.

Mandated checks place extra scrutiny over documents or certificates and helps strengthen compliance by ensuring all documents are properly captured and vetted.
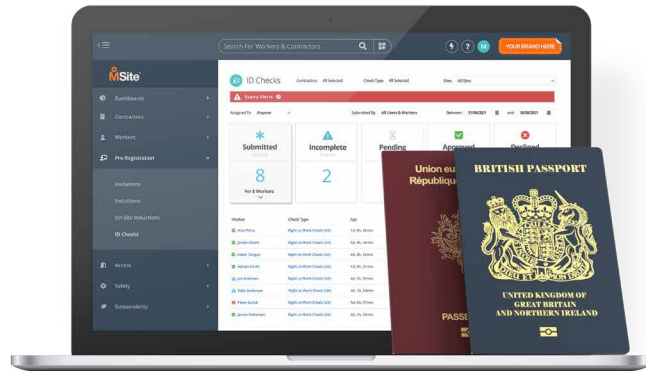

Mandate Physical Checks

Requires a nominated person from the site team to physically 'check' right to work and competency documents are present and correct.

Right to Work Compliance

Fully compliant Right to Work check (including EU countries post Brexit), which demonstrates leadership in workforce management best practice.

Sensitive Sites

Ability to complete enhanced verification checks for operatives working on sensitive sites, for example creating a DBS check workflow for school projects.

Did you know?
You can automatically restrict site access if checks are not complete.

MSite Digital Signage

Digital Signage allows important site information you want operatives and visitors to see to be displayed on MSite TV screens across site.

Create your own customisable display, showcasing site KPI's and other important information to the frontline workforce, such as hygiene information or safety updates.

Instant Communication

Send important information to your workforce instantly, removing the delay associated with messages being filtered down the organisational hierarchy.

Live Data

Keep everyone up to date with live site statistics, pulling site data directly from the wider MSite system in real time.

Reinforce Information

Ensure important safety information is reinforced, such as warning workers about specific hazards or conditions and Covid-safe site procedures.

Did you know?
You can send information to individual workers via MSite's Direct-to-Worker Notifications in the Workforce App.

Ramtech
Fire Management

WES3 is the latest in fire and emergency alarm system innovation developed by the fire experts at Ramtech and used on sites across the world.

It is an advanced, EN54 compliant, alarm system, developed to provide a simple fast and secure method of communicating fire and medical emergencies across sites.

Completely Wireless System

WES3 is a completely wireless system that has a 3-year battery life and can be relocated easily from one site to another.

Enables Site Communications

WES3 delivers real-time alerts via the REACT platform to all relevant personnel, along with emergency information such as site plans, evacuation routes and emergency procedures.

Easy Setup & Integration

Simple to install without an engineer visit and integrates with MSite access control, setting turnstiles to free spin the moment an alarm is triggered.

Ramtech MSite integration

As and when projects mobilise an MSite engineer will attend site to install access control hardware and connect it to Ramtech's fire safety system.

Service
Pledge

Great service matters. That's why we take our service pledge seriously. We promise:

Online training to make sure you get the most out of MSite

A rapid turnaround from purchase order to installation

Access to our friendly, helpful support desk and a dedicated Account Manager

An easy to use user interface and support to maximise worker utilisation

Power of Data

MSite enables you to run reports and view live dashboards on everything you need to know about your workforce.

Depending on your package, you can also run reports on social value, sustainability and more.

You're in Safe Hands

MSite captures rich data about your workers throughout the worker journey on a single cloud-based platform.

The system is GDPR compliant & fully secure.

API

An MSite API enables two separate applications to 'talk' to each other.

Data on your workforce and site operations can be shared between MSite and other third party systems on site, such as EGR systems.

Did you know?
The API feed can also be used for Power BI reports.

On-boarding new sites

New sites will receive training on how to use MSite, including:

Pre-installation training

A run-through of the system by our engineer during installation (when hardware is required on site)

A check-in following the installation and set up

Training wrap-up and Q & A
